HERRERA HAIR
EXTENSIONS

Tape In Hair

Tape-in hair extensions are made of high-quality Remy human hair, so they look and feel completely natural. They're also non-damaging and lightweight, making them gentle on your own hair. Plus, they can be reused multiple times with our hair replacement tape.

1

Invisible Tape In Hair Extensions

Invisi-Tapes are the latest innovation in the hair extension market. They are unbelievably realistic and provide a natural, undetectable transformation for fuller, voluminous hair. These are the best tape in hair extensions for thin or fine hair.

2

PU Tape In Hair Extensions

Tape Hair Extensions can be easily and gently attached to the hair by means of a unique adhesive strip or tape technology – and just as easily removed again using a special solution that is completely safe for your hair. After reapplication of the adhesive, the strands can be immediately reattached to the hair roots – without returning them to the stylist or long processing.

3

Handtied Skin Tape In Hair Extensions

The Hand Tied Tape-In extensions are made by hand- each strand of 100% Remy human hair is hand-tied to a mono-mesh weft base to effortlessly blend to your scalp when installed. The color process is slowed down to ensure the hair's integrity is kept intact

Flexibility, Convenience, and Comfort

- Add length and volume to your natural hair in minutes with no damage
- No clips, no glue, no sewing - easy to install and remove
- 100% Remy human hair extensions, available in a range of colors and lengths
- Can be styled, washed, and flat ironed just like your own hair
- Perfect for thin hair or fine hair - Blends with your own natural hair

Pre- Bonded Hair Extensions

Advantages of Keratin Bonded Hair Extensions
Keratin bonded hair extensions offer a long list of benefits.

They add length and volume to your hair
Fully customizable to match or improve your natural hair color
Long-lasting and durable
Keratin bonded hair extensions last for as long as six months with proper care
The placement of the bonds allows your hair to move naturally
They offer more natural looking hair than taped-in or sew-in hair applications
Experiment with color without permanent dye, bleach, or harsh chemicals
Fewer maintenance appointments than with other types of hair extensions
Curl, dye, straighten, and style your extensions just as you would with your real hair

I tip, U tip, Flat tip , Y tip V tip hair extensions under Pre-bonded Hair
Extensions

These fusion hair extensions are almost the same except the shape of the keratin at the end of each strand, heating up the keratin tip found at the end of the extension, to attach it to your natural hair.

I-Tip extensions are a favorite in the salon! These extensions will provide your clients with natural movement and a lightweight feel. No heat or glue is used during application making this technique a must-have!

How to apply:

1. Gather a section of hair where extension will be applied.
2. Use Loop Needle or Pro Pulling Needle to thread tube onto hair. (Recommendation: Have multiple threading needles on hand)
3. Insert I-Tip extension bond into Protube. (*Pro Tip: Match tube to root color)
4. Firmly press tube flat using Pro Closer and repeat process until desired look is achieved!

Maintenance: Lasts 8-10 weeks (Reuse 2-3 times)

Herrera Hair

I Tip Hair Extensions

Nano Rings Hair / Nano Beads Hair Extensions

Nano Rings hair extensions, also known as nano beads hair extensions, are a hair extensions method that doesn't require any heat, glue or adhesive.

How Do Nano Rings Work?

The nano ring can only be used to attach nano-tip extensions to your hair. The regular I-tip hair extensions are too big and will not thread through the nano ring. At the end of each hair extension is a tiny wire. This is different than the tip of an I-tip hair extension, which uses a keratin bonding agent to glue the hair together. Because of the wire, nano-tip extensions are lighter and allow your hair more freedom of movement.

You attach the extension by threading both the tiny wire and the hair it will be attached to through the nano ring (don't worry, there is a bead application tool that makes this easy), then clamping the two together using pliers to crimp the nano ring.

U-Tip Hair

HERRERA HAIR
EXTENSION

How to apply:

1. Use Pinky Tool to gather a section of hair where Keratip will be applied, place through Heat Shield and secure with a duckbill clip.
2. Place Keratip bond on top or underneath sectioned hair.
3. Heat Keratip bond with Pro Fusion Tool until bond is fully heated.
4. Roll heated bond completely around section of hair and pinch top to seal.

How To Make The Perfect Bond

HERRERA HAIR
EXTENSION

Flat Tip Hair

1
Section out of the way the sides and crown. Then take around two fingers width section from the bottom. This is your base row. Starting from the centre of the head you will form a section using your fingers or a clip create a rectangle shape. If your client's hair is less dense then you will need to go slightly deeper with your section.

2
Once you have achieved your desired section place a metal clip underneath to isolate the rest of the hair. You are now ready to apply your micro bond. Place the flat tip of the extension underneath the client's own hair. This should be about a finger width away from the root.

3
Once in place use your London Hair Lab heat tool to bond the tip onto the hair. Hold down for 1-2 seconds until you see the tip breakdown slightly then immediately roll using your fingers to form a nice compact sealed bond.

4
The quicker you roll the better and more compact the bond will be.

5
The extension should sit nice and flat and should look like the picture below. For an even smaller bond, great for around the hairline, ears and front. You can cut your flat tip in half and take a slightly less deep section.

HAIR WEFT

Recommended amount:

*Each Hair Weft package contains 3 oz.

3-6 oz. for full-head application

HERRERA HAIR
EXTENSION

The original extension technique that's fully customizable to fit your clients' needs! Wefts are a "track" of hair that can be applied by beads, braid & sew technique, tipped into individuals, or even made into clip-ins. The possibilities are endless.

How to apply:

The Hair Shop Wefts can be worn in many ways. Traditionally, they are braided in with natural hair or attached with Protubes. They can also be custom made into custom clip-ins, wigs, or hairpieces. Please note: for any Wefts that are cut they need to be sealed to prevent shedding.

Maintenance: Depends on application method

HANDTIED HAIR WEFT

Discreet, seamless, and lightweight! Hand-Tied Weft has been masterfully hand crafted to provide volume and length while blending seamlessly into the hair. This technique is extremely natural looking and the latest trend in hair extensions! Hand-Tied Weft is applied through waterfall method by applying beads to natural hair as an anchor.

How to apply:

Hand-tied weft can be applied multiple ways! Common application techniques include braiding & sewing to natural hair or applying beads to natural hair as an anchor.

Maintenance: Depends on application method

**Please note: DO NOT cut the weft. Each weft has a width of 10.5" designed to fit temple to temple.*

Recommended amount:

*Each 18" bundle contains 13g

*Each 22" bundle contains 18g

8-12 bundles for full-head application

Genius Weft

Thinnest, flattest, and most lightweight weft, Genius Weft provides a beautiful, high-quality hair extension experience. This virtually invisible weft uses 100% virgin human hair, can be cut for easy customization, and has no return hairs that can irritate the scalp. Genius Weft is a great alternative to our Hand Tied and Seamless wefts, while perfectly blending the best qualities of both.

- Only 0.78mm thick and 1.71mm tall (Hand Tied Weft is 0.76mm thick and 1.16mm tall)
- Color purity: 4.5:5
- Weft can be cut to custom size
- Ultra-thin and lightweight weft
- Invisible weft technology
- No return hair

CLIP IN HAIR

HERRERA HAIR
EXTENSION

Clip-Ins are by far the most user friendly hair extensions available today. Clip-ins are great if you love to change your look quickly and easily. In a matter of minutes you can add several inches of length as well as double your volume.

How to apply:

1. Brush natural hair and clip-ins before applying.
2. Use Pin Tail Comb to section off hair beginning at the base of the scalp.
3. Hold excess hair away with Shark Clips.
4. Backcomb and hairspray section before securing each clip attached to the weft onto your natural hair working your way upward.
5. Brush out hair to achieve a seamless blend between the hair extension and your natural hair and style as desired.

HALO HAIR

HERRERA HAIR
EXTENSION

This halo hairpiece is a must-have for instant voluminous results. Its multi-layered base is made with machine weft and a soft lace. The Hair Shop's Volume Veil comes with an optional invisible band that is easily applied 3 fingers away from the hairline and lays discreetly.

How to apply:

1. Place the Volume Veil over your head with 3-4 fingers away from the hairline.
2. Using a Pin Tail Comb section your natural hair over the applied volume veil for coverage.
3. Secure application by clipping the 5 clips to your natural hair.
4. Style as desired & enjoy!

Wrap Ponytail

HERRERA HAIR
EXTENSION

A girl's best friend! Enhance your daily ponytail with this all-in-one app for instant length and drama. A new hairstyle for any occasion.

How to apply:

1. Gather natural hair into a ponytail and secure with hair tie.
2. Insert the Wrap Ponytail's comb into the top portion of your natural hair.
3. Wrap divided hair tightly around to cover the velcro for a seamless updo look.
